

Quick-Start Guide

ArcGIS® Business Analyst Server 9.3.1 for the Microsoft® .NET Framework

1

Prerequisites

- Uninstall ArcGIS® Business Analyst Server 9.3 and ArcGIS Business Analyst Server Data—2008, if installed.
- Ensure that the version of ArcGIS Server for the Microsoft® .NET Framework is 9.3.1, if installed.
- Review the ArcGIS Business Analyst Server 9.3.1 Installation Guide (install.htm), which can be found on DVD #1 in the root directory.

2

Install

- Insert ArcGIS Business Analyst Server DVD #1 into your drive. Follow the directions on-screen to complete the data installation.
- Once the data installation has completed, insert ArcGIS Business Analyst Server DVD #3 into your drive. Follow the directions on-screen to complete the software installation.

- Please note that your attention will be required from time to time during the installation process.

3

Product Features

- ArcGIS Business Analyst Server comes with several features that are ready to use straight out of the box. After the software installation is completed, in most cases, the postinstallation will launch. When the postinstallation is completed, the Web applications postinstallation will launch. The ArcGIS Business Analyst Server postinstallation can be run anytime from the shortcut on the Start menu. Upon successful completion of these postinstallations, you will be able to use the features below using the appropriate URL links. To access the features on a remote instance of ArcGIS Business Analyst Server, replace localhost with the ArcGIS Business Analyst Server host name in the URL.
- Analysis center—This Web application for business users can be launched from your machine using the URL <http://localhost/arcgis/baserver/analysiscenter>.
- The ArcGIS Business Analyst Server REST Services directory for business developers can be invoked using the URL <http://localhost/arcgis/baserver/rest/>.
- The SOAP WSDL for advanced developers can be consumed using the URL <http://localhost/arcgis/services/defaultmap/mapserver/baserver?wsdl>.
